All Terrain Dump Trailer

Logrite's All Terrain Dump Trailer is rugged and engineered to be the finest quality. The dump trailer is all steel construction with a torsion flex axle suspension. The trailer has four removable sides for carrying wide loads. A spacious tool box beneath the bed allows you to carry all the necessary tools with you without filling the bed. Stuff the tool box with your saw, safety gear, fuel, tools and straps. The All Terrain Dump Trailer features a mechanical load controlling dumping mechanism which allows for constant control over the load. The scissor jack is easy to use and maintain and there is no need to worry about batteries, hydraulics and wiring.

Dimensions:

Trailer: 108" x 50" x 42"
Bed: 60" x 48" x 16"
Tool box: 22" x 48" x 5"
GVW: 2000 lb
Weight: 465 lb
Tires: 23 x 10 1/2 x 12

Other Features:

50" trail rated
2" ball coupler

zinc plated tool box
powder coated bed

BTS Hauler - Hand Truck and Cart All-in-One Unit

Using our ULTRA arch as our starting point, we set out to design the best ergonomic hand truck on the market. The hand truck's ergonomic handle system allows you to lift logs, barrels or anything large and bulky with ease and comfort.

And the best part - both the hand truck and brush cart fit through a 36 inch gate, places where other carts just won't go!

The BTS Hauler is a 2-in-1 hand truck and brush cart unit which features 1500 lb load limit and 46 cubic feet of space. No tools are needed to convert the hand truck into the brush cart. Just pull the 4 hitch pins to convert the unit. BTS Hauler breaks down to fit into your truck tool box or trunk.

The unit is so compact it can ship by ground carriers to your door.

For extra leverage and/or better ergonomic position use the gooseneck to extend the handle.
